SERVICE ENABLEMENT VIA ON DEMAND RESOURCES

ABSTRACT

A method, apparatus, system, and signal-bearing medium that in an embodiment
determine whether a task is allowed to use a service-enabled resource, wherein the
service-enabled resource is disabled until a fee is paid. If the task is allowed to use the
service-enabled resource, then the service-enabled resource is allocated to the task. If the
task is not allowed to use the service-enabled resource, then a non-service enabled
resource is allocated to the task.
